## Coin Processing Ancillaries

The new alternative for casinos, vending machine operators, banks and any other facility with substantial coin management needs, Coin Bricks are coin containers with a difference.

**They are more economical.** They last longer than any other alternatives because their heavy-duty construction makes them virtually unbreakable in normal use – and that's guaranteed.

**Coin Bricks are more efficient.** Their stackable design makes for easier handling, both in storage on racks and for transportation in purpose-designed carts and trolleys. Colour-coded lids and seals make for easier identification of coin denominations and faster inventory count.

**Coin Bricks provide more security.** They offer two options – a standard tamper-evident security seal or a high-security seal which accepts a padlock or tie seal.

**Coin Bricks are more versatile too.** They come in two different sizes and with a range of accessories such as hopper filler, trolleys and carts for transportation, and coin sorter accessories.

### Specifications

#### Large Brick

Height 290mm  
Width/Depth 120mm  
Capacity 3L, approx. 2,000 US 25¢ coins
